ABOUT ME

I have mastered divergent thinking, connecting seemingly irrelevant ideas, information, and resources in order to tackle all challenges in novel, cost-effective, innovative, and sometimes surprising ways.

This, tied with my constant focus on self-improvement, endeavoring for perfection in all tasks, and focus on seeing the positive in all things, makes me a rare and highly valuable addition to any group, client, or company that wants to take their business goals to the next level.

With **30+ years of experience** in the technical and audiovisual arts… from traditional pencil sketches to 3D renderings; from flip-book animation to 4K video editing; from coercing a TRS-80 to squeak out a melody to full 64-track surround sound music production; from using Notepad.EXE to hand-code a website to mastering database-driven content management systems using .NET, HTML5, and CSS3… it is no wonder why I have garnered the nickname
"Adobe Wan Kenobi"
